ANTISCHIUMA SI CONC.

Features

Antischiuma SI conc. is an emulsion, rich in emulsifier, even if it has a relatively low viscosity. It is easily dosable and very versatile from the application point of view. With a solid content of about 17% this emulsion is resistant to acids and alkalis, which allows its use in a wide range of applications, where pH is a critical factor.

Applications

Antischiuma SI conc. has proved to be particularly effective in the abatement of foam in auxiliaries and textile processes (such as dyeing), in surfactant formulations, in cold lubricants based on mineral oils.

Moreover it is a valid support in the abatement of the foam in the most varied applications. The versatility of this additive makes it a highly appreciated auxiliary product in the entire chemical industry.

Also in the treatment of waste water this product has revealed good anti-foam properties.

Other features

Appearance: white emulsion

Solid content: about 17%

Ionogenicity: non-ionogen

pH: about 7

Recommended dosage: about 0.1-1%

Storage stability: 6 months in packages tightly closed at temperatures below 25 ° C and protected against freezing. The fact that the material is stored after this deadline does not necessarily mean that the goods can no longer be used. However, in this case it is necessary to check the most significant characteristics.

Keywords: antifoam, foam
