## GAMMAUBEX

Carnauba wax in water solution

**GAMMAUBEX** is an emulsion of brown color of carnauba wax, further water-dilutable, having strong hydrophobic properties, restructuring, tonifying and polishing,. Formulated with non ionogenic emulsifiers, it does not interact with the system in which it's insert and it's stable even at high dilutions.

### CHEMICAL AND PHYSICAL FEATURES :

Appearance		LIQUID
Odour		TYPICAL
color		BROWN
Solubility		dispersible in water
COV	%	absent
Stability		PROPERLY STORED MONTHS 6 - SHAKE BEFORE USING

### STABILITY 'AND STORAGE:

Since this is a wax of vegetable origin **GAMMAUBEX** it should be used within 6 months from the packing date in order to have the best possible efficiency. Store between + 5 and + 30 ° C in well sealed and preferably full drum. Do not leave much time for the product in drums almost empty. In this case it is good to decant the residual content into smaller containers.

### USES AND APPLICATIONS:

**GAMMAUBEX** emulsion is very fine, it can be diluted in water to be used as such or as an additive for formulation of waxes, polishes, water repellent, Toners and restructuring. The percentage of dilution in water of **GAMMAUBEX** is a function of the specific use, the type of co-formulants and the dosing system and application. The carnauba wax which represents the principle an active product has the property to create in contact with the air a flexible film, water-repellent, covering the surface of the support and is able to create a tone of light brown color. For obtain variables effects **GAMMAUBEX** can be co-formulated.

### PACKAGES AVAILABLE:

Drums 25Kg - 50Kg - 120Kg - 200Kg 1000Kg tanks

Keywords: wax, carnauba, hydrophobic, hydrophilicizing, restructuring, tonifying, polishing, polish, water repellent, filming,
